

2017 Wheat Varieties

HIGHLIGHTS

SY Ingmar is the leading spring wheat variety in North Dakota for 2017. SY Ingmar accounts for 17.8 percent of the 5.25 million acres of spring wheat planted in 2017. SY Soren now ranks second with 10.8 percent of the spring wheat acreage. Linkert represents 6.9 percent of the spring wheat planted and ranks third. Barlow ranks fourth with 6.8 percent of the spring wheat acres planted. Elgin-ND accounts for 5.6 percent of the spring wheat acreage and ranks fifth. These top five varieties account for 47.9 percent of the spring wheat planted in 2017. North Dakota continues to rank first in spring wheat acreage in the United States, with 48.2 percent of the nation's estimated 10.9 million acres planted.

Joppa is the leading Durum wheat variety in North Dakota for 2017. It takes over this position from Divide which had been the leading variety planted the previous eight years. Joppa accounts for 18.0 percent of the 1.12 million acres planted compared with 10.3 in 2016 and 0.9 percent in 2015. Divide now ranks second with 16.8 percent of the Durum wheat acres planted. Cario and Alkabo rank third and fourth, respectively, with 14.9 and 11.1 percent of the Durum wheat acres planted. Tioga ranks fifth with 7.9 percent. These top five varieties account for 68.7 percent of the Durum wheat acreage in North Dakota for 2017. North Dakota continues to rank first in Durum wheat planted acreage in the United States with 58.4 percent of the nation's estimated 1.92 million acres planted.

WB Matlock is now the leading winter wheat variety planted for 2017 as it accounts for 12.2 percent of the winter wheat acreage in North Dakota. It takes over this position from Jerry which had been the leading variety planted the previous 13 years. SY Wolf and Decade rank second and third, respectively, with 11.4 and 6.9 percent of the winter wheat acres planted. Jerry now ranks fourth with 5.7 percent of the winter wheat acreage planted in North Dakota. These top four varieties account for 36.2 percent of the 65,000 acres planted in North Dakota for 2017.

SURVEY DESCRIPTION

The data in this report are based on a survey of wheat producers conducted during June by the North Dakota Field Office of USDA's National Agricultural Statistics Service. **Thank you to each person who supplied data and made this report possible!**

Results include acreage and percentages at the State and Agricultural Statistics District levels. All variety acreage numbers in this publication are based on survey averages. Highly reliable state averages are produced from 2,360 positive reports from 4,100 respondents. At the district level, the number of reports for minor varieties is generally limited. Thus, yearly fluctuations in the district variety acreage may be the result of sample variation.

The ND Wheat Commission, the ND Ag Experiment Station, and the ND State Seed Department provided

funding for this survey. The NDSU Extension Service provided variety descriptions. Access to this report is available for free online at www.ndwheat.com or www.nass.usda.gov/nd/ For further questions, please contact the North Dakota Wheat Commission at (701) 328-5111 or NASS at (800) 582-6443.

SPRING WHEAT

SY Ingmar is the top variety in North Dakota for 2017 with 17.8 percent of the 5.25 million acres of spring wheat planted. It is the leading spring wheat variety planted in the northwest, north central, west central, central, and south central districts. SY Ingmar was released by Syngenta/AgriPro in 2014 and has semi-dwarf height, strong straw strength, high grain protein, and good milling and baking quality.

SY Soren ranks second with 10.8 percent of the spring wheat planted. Released in 2011 by Syngenta/AgriPro, SY Soren has semi-dwarf height, strong straw strength, medium-early maturity, high test weight, and good milling and baking quality.

Linkert ranks third with 6.9 percent of the spring wheat acreage. It is the leading spring wheat variety in the northeast and east central districts. Released by the University of Minnesota in 2013, Linkert has strong straw strength, medium-early maturity, high grain protein, average test weight, and excellent milling and baking quality.

Barlow is the fourth leading variety with 6.8 percent of the spring wheat acreage. Released in 2009 by NDSU, Barlow has semi-dwarf height, medium-strong straw strength, medium-early maturity, high test weight, and good milling and baking quality.

WINTER WHEAT

WB Matlock is now the most popular winter wheat variety with 12.2 percent of the 65,000 acres of winter wheat planted. WB Matlock was released by WestBred in 2010 and has medium height, strong straw strength, medium maturity, and good overall quality.

SY Wolf ranks second with 11.4 percent of the winter wheat planted acres. SY Wolf was released by Syngenta/AgriPro in 2010 and has semi-dwarf height, strong straw strength, very good disease tolerance, and good test weights.

Decade ranks third with 6.9 percent of the planted winter wheat acreage. Decade was released by NDSU and Montana State University in 2010. It has short height, moderate straw strength, medium maturity, and good overall quality.

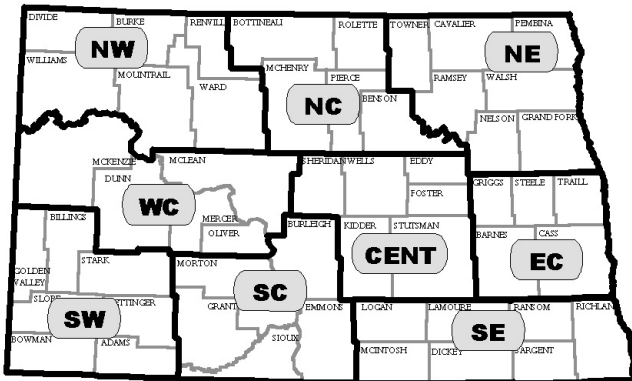

Jerry now ranks fourth with 5.7 percent of the winter wheat planted acres. Released in 2001 by NDSU, Jerry has medium height, strong straw strength, medium maturity and good overall quality.
